fine organizations

## 87<sup>TH</sup> ANNUAL MEETING

We would like to thank all the members who were able to join us for the 87th Annual Meeting. We awarded several large door prizes in the form of electric lawn equipment, and also had some cash drawings. The food was great, and our guest speakers were informative on the topics of water supply for the upcoming irrigation season and ag market conditions. If you weren't able to attend and you have questions for us, please give us a call; we would be happy to visit with you.

## WYRULEC SCHOLARSHIP PROGRAM

Ten local students were awarded scholarships at the 87th Annual Meeting on March 30th. Each year we award up to \$10,000 in scholarships to students who receive their electrical power from Wyrulec Company. The Scholastic and Trade scholarships (\$1,000 each) are made possible by funds from donated or unclaimed capital credits. Tri-State Generation & Transmission also finances two \$1,000 scholarships for member students.

Wyrulec Company is dedicated to the communities we serve, and we're proud to provide an investment in the future of our youth.

We would like to congratulate the following outstanding students on earning a scholarship to assist in their pursuit of a higher education. Recipients are chosen by a Scholarship Committee of one volunteer from each of the member districts.

**The following names have been drawn for a \$25 bill credit. Contact Wyrulec Company at 877-WYRULEC to claim your credit!**

Kent Ditter

Wayne Breffle

Nancy Otto

Timothy Gifford

Michael & Brandy Tighe

### Energy Efficiency Tip of the Month

The location of your thermostat can impact your HVAC system's ability to maintain an ideal indoor temperature. For maximum accuracy, thermostats should be placed in the center of the home, away from air vents, plumbing pipes and exterior doors. Avoid placing items like lamps and televisions near your thermostat, which can cause the HVAC to run longer than necessary. Avoid installing thermostats in rooms that tend to feel warmer or colder than the rest of the home. Do not place furniture in front of the thermostat, which can block air flow and result in inaccurate readings.

# A Safe, Happy House

Four Easy Ways to Boost Electrical Safety at Home

**DON'T**

place flammable items, like potholders, napkins or dish towels near the stove while cooking.

**DO**

keep electrical devices away from water to prevent electric shock.

**DO**

ensure you're using the correct wattage in all light fixtures.

**DON'T**

overload electrical outlets with more devices than the circuit can handle.

May is National Electrical Safety Month.
